

Young Innovators

Systems change begins in schools

Bram Drijvers
EIT Climate-KIC

To catalyse systemic change for climate action.

Our Vision

A prosperous, inclusive, climate resilient society with a circular, net-zero emissions economy by 2050.

Systems innovation

Our Promise

Transformation, in time, through innovation.

Why Systems Transformation?

Systems?

A configuration of elements that are connected through a web of relationships forming a whole that is greater than its parts.

A NEIGHBORHOOD, CITY OR REGION

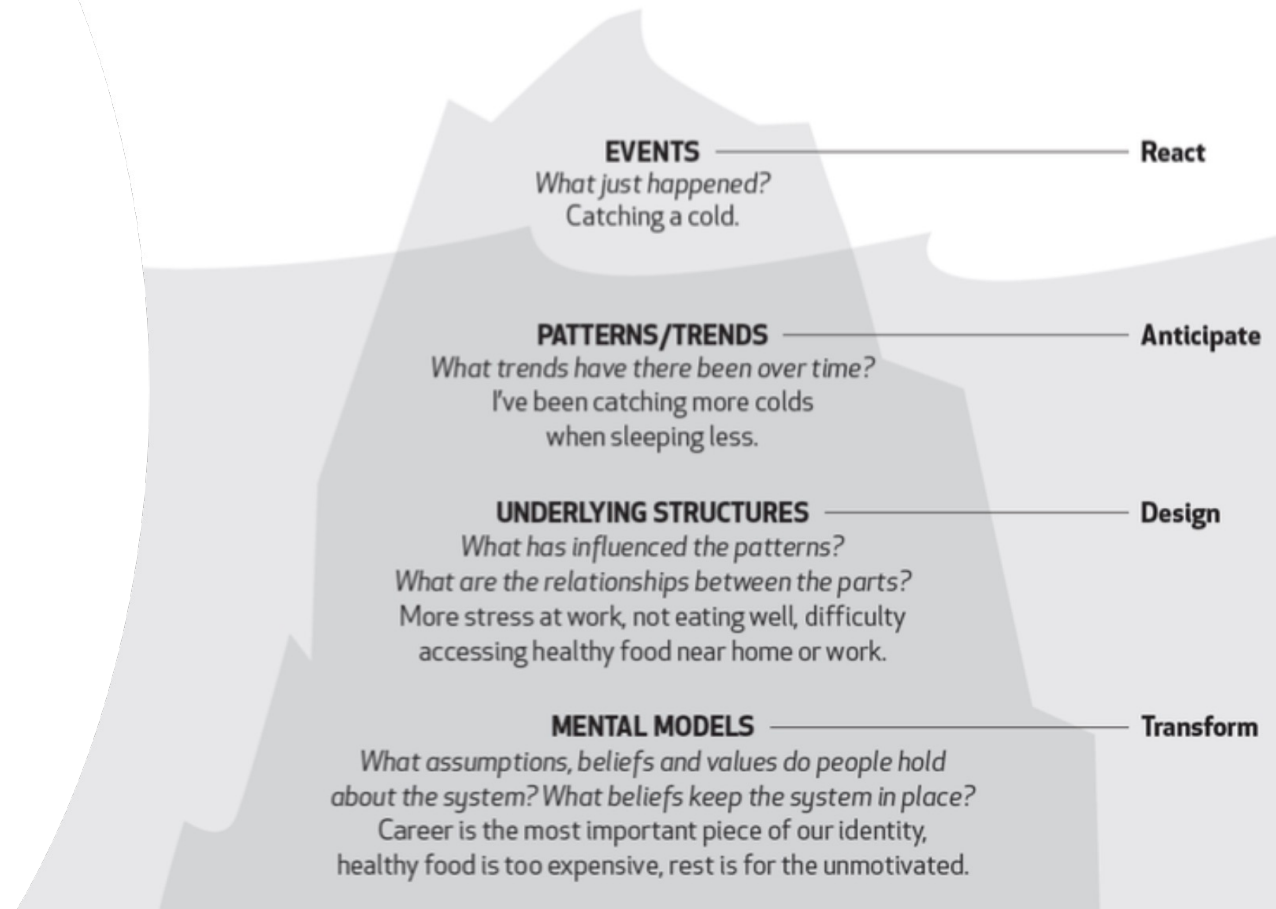

AN ORGANIZATION OR COMPANY

A COUNTRY'S FOOD SYSTEM

THE ICEBERG

A Tool for Guiding Systemic Thinking

A decorative graphic consisting of two overlapping, curved lines in a light blue color, resembling a stylized leaf or a drop shape.

Today's teenagers are the climate leaders and innovators of tomorrow. They are already leading the way by protesting and in their own personal choices.

Young people can act as catalysts for systemic change and trigger climate innovation. But it is up to us to empower them and provide them with the agency to innovate solutions.

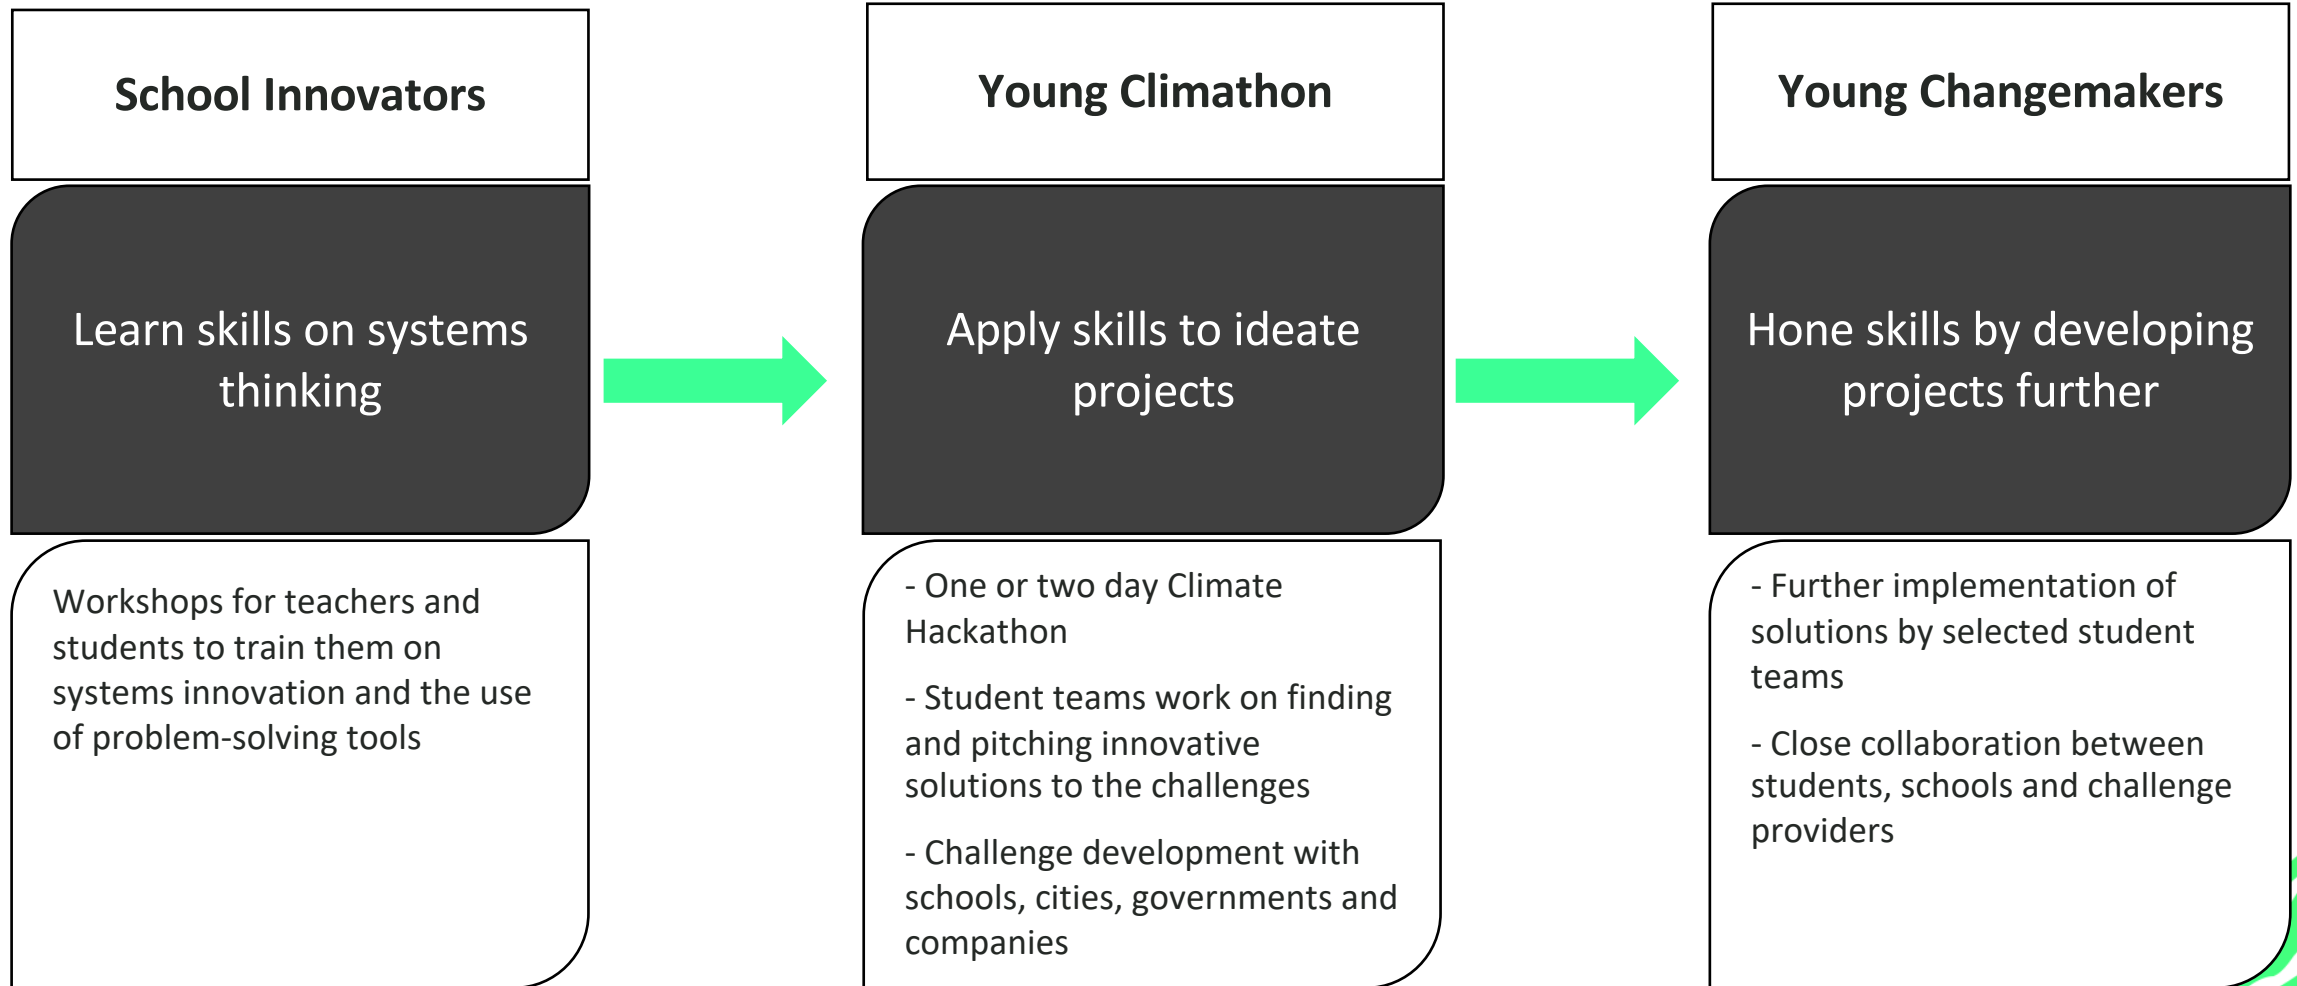

Young Innovators is an experiential programme that introduces a systems innovation approach to young people and empower them to tackle climate change challenges

With the Young Innovators programme it is our mission to **empower future generations** to lead us to a net-zero carbon economy.

We want to equip young people worldwide with the **skills and competencies needed** to become changemakers and lead systemic innovation

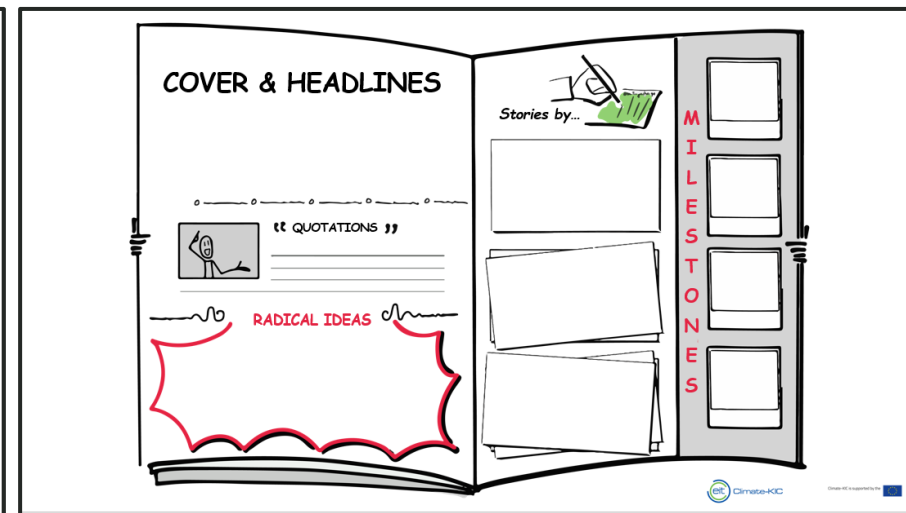

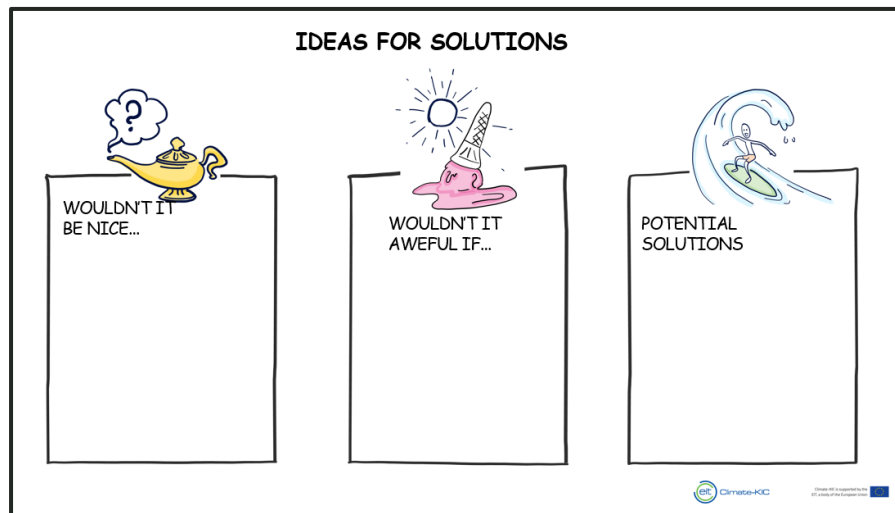

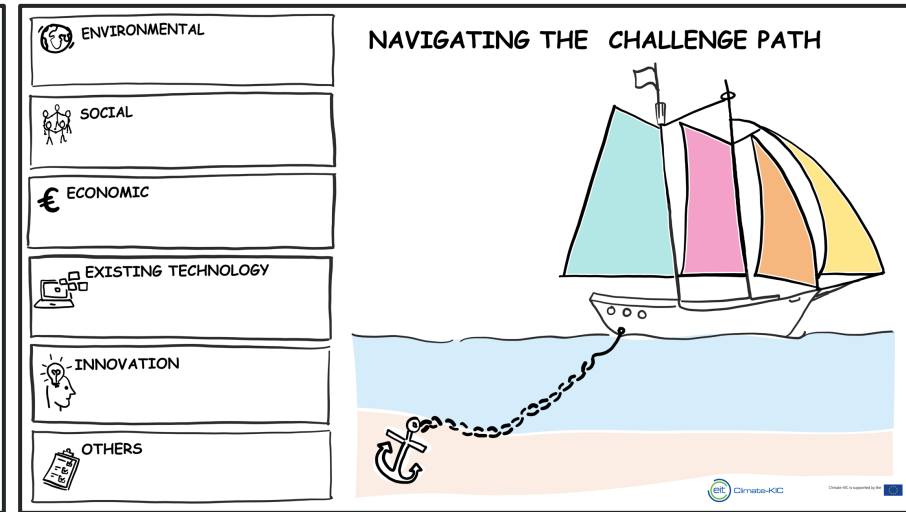

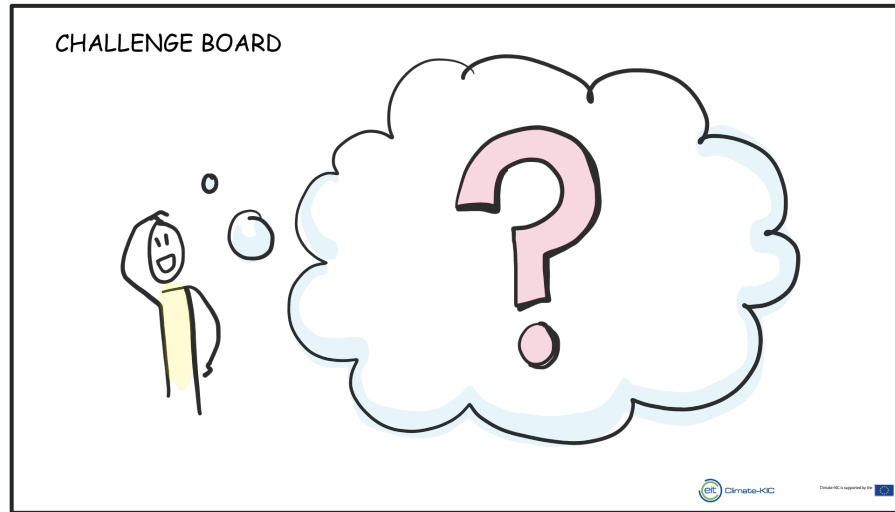

We want to transform the education system by **mainstreaming climate change education** and embedding systems thinking and challenge-based learning.

Three parts to achieve our mission

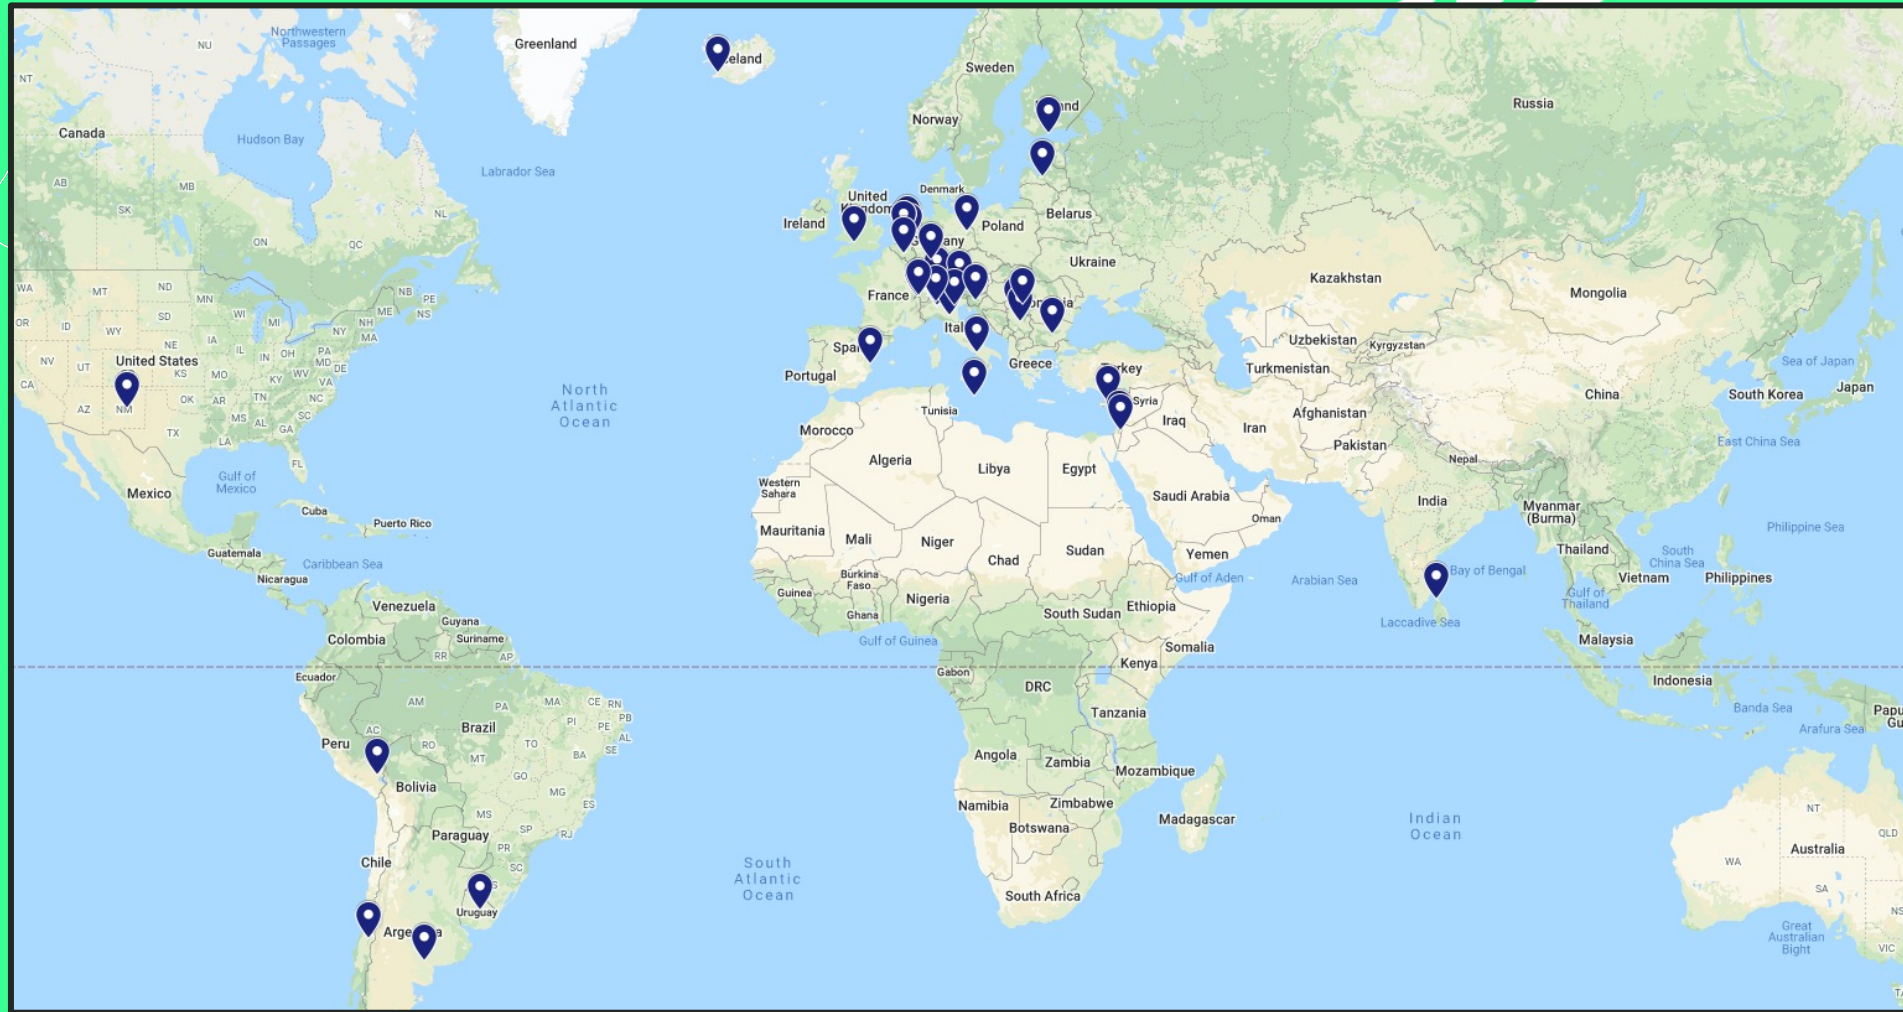

Through challenge-based, experiential learning we empower partners, teachers and educators to contribute to carbon neutrality and help transform systems for the future.

Participatory tools to help students consider all aspects of a challenge

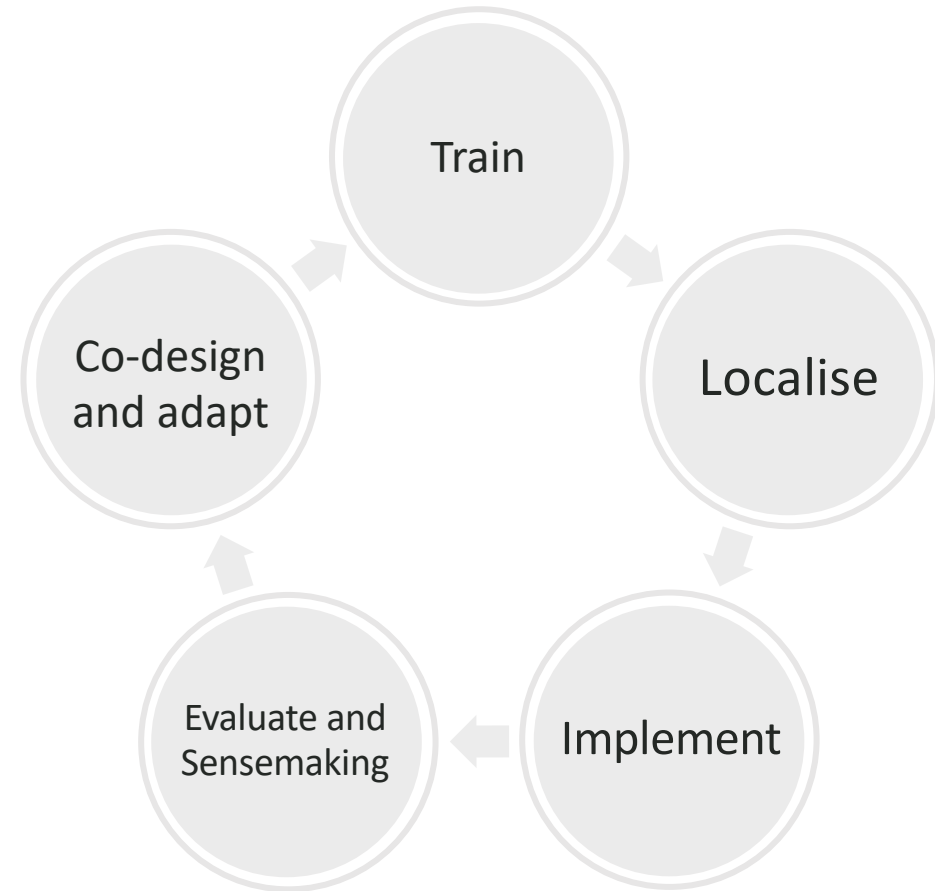

Young Innovators is spreading across the world

We co-design our programme methodology together with our global community of delivery partners.

And we shape our strategy and mission together with funders, amplifiers and educational experts.
