

Wilding Pedagogies for a Sustainable future

Zoe Theodosaki

22/2/2023

Few words about me

- Bachelor studies as english language teacher – 10 years of teaching experience
- 15 years in Environmental Education and Education for Sustainability
- Master studies in Env. & Sust. Ed.
- MA thesis in Ecocentric Pedagogy – Holistic Learning & Wild Pedagogies
- **Great interest in promoting Wild Pedagogies in formal education!!**

What is wrong with formal schooling today?

- It reproduces the existent social-economic system
 - The existent system is highly unsustainable
- therefore
- Formal schooling does not work toward sustainability

“More of the same kind of education can only make things worse”

(David Orr, 2011)

2 generative questions

What does it take to create a generation of healers and restorers of the Earth?

We need to re-wild pedagogies

(wild=free to do as will, un-domesticated, untamed)

What is stopping us?

Lack of imagination

Our difficulty to imagine a different social structure

***“All education is
[should be]
environmental
education”***

(David Orr, 2011)

Wild Pedagogies

6 touchstones

Nature as Co-Teacher

Allow time in nature with myriads of beings who can teach

Embrace the unpredictable

The spontaneous, the subjective, be prepared to be unprepared

Wild is everywhere

What matters is how we approach it (equals or superiors?)

Education is a political act

Either you are part of the problem or part of the solution

Time is important

Learning requires time, nature cycles, observation, meditation

Community building

Against schooling that promotes individuality and competition
