Look at the picture and read the excerpt that follows.

Can you find examples of bioeconomy uses in your daily life?

How does nature support the bioeconomy?

<https://capitalscoalition.org/a-capitals-approach-for-a-sustainable-bioeconomy-by-andrew-neill/>

The bioeconomy means using renewable biological resources from land and sea, like crops, forests, fish, animals and micro-organisms to produce food, materials and energy.

OUR CONSORTIUM

Funded by
the European Union

Stronger development of the bioeconomy will help the EU accelerate progress towards a circular and low-carbon economy. It will help modernise and strengthen the EU industrial base, creating new value chains and greener, more cost-effective industrial processes, while protecting biodiversity and the environment.
